

PERSONAL ECO-FOOTPRINT CALCULATOR

Complete each of the charts indicating your actions on a typical day in your life. Scores should all be placed in gray boxes - some will be blank. (Some sections have white scoring areas, but these should be added with the total to be put in a gray box @ the top. Add the points on each chart to obtain a subtotal (bottom of each category) for that category and transfer it to the summary chart at the bottom of Page 2.
